DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claim 1 is rejected under the judicially created doctrine of double patenting over claim 1 of U. S. Patent Nos. 6,534,926 & 6,727,664, respectively, since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: a portable light generating apparatus comprising a ballast circuit comprising a single self-oscillation circuit and a single protection circuit; a plurality of light emitting elements (i.e., fluorescent lamps) connected in parallel to the ballast circuit. It is the position of the examiner that one skilled in the art could not practice the invention of claims 1-21 and 1-7, respectively, of U. S. Patent No. 6,534,926 & 6,727,664 without infringing the instant claimed invention.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2821

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Riesinger (US 6,169,373).

Re claim 1, Riesinger discloses a portable light generating apparatus (i.e., work light) comprising:

a power cord (36);

a ballast circuit (i.e., a normal alternating network) receiving power from the power cord (36) via a main circuit connection **23** (Fig. 3) comprising: a single self-oscillation circuit (i.e., transistors and other elements **TR1**, **TR2**) and a single protection circuit (i.e., **PTC1**) (Fig. 3; Col. 3, lines 18-38; Col. 4, line 63- Col. 5, line 22; Col. 6, lines 5-20);

a plurality of light emitting elements (i.e., an illumination sources **10**, **28**) independently connected in parallel to the ballast circuit (Fig. 3, abstract; Col. 2, lines 60-65; Col. 5, lines 23-40); and

an enclosure assembly (i.e., a guard tube **2**) fixedly attached to a first end of the power cord and further enclosing the ballast circuit (i.e., normal alternating network) and the light emitting elements (i.e., illumination sources **10**, **28**) (Fig. 2; Col. 4, lines 42-62).
